

Customer Journey Map — Standard Laptop Request

Project: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Student: Dharshini M

Team: Individual

Date: 30 September 2026

1. Request

Requester opens Service Catalog and selects Standard Laptop. The item is available under the Hardware category.

2. Submission

Requester submits the catalog item. A request and Requested Item are created.

3. Automation

The Service Catalog trigger starts the Standard laptop task flow.

4. Fulfillment Task

Create Catalog Task generates SCTASK0010001 linked to the Requested Item.

5. Fulfillment

IT fulfillment user works the generated task and updates its state.

6. Traceability

Requester/administrator can trace REQ → RITM → SCTASK.
